Jakarta, 25th July 2025

SUBJECT: PRESCHOOL GENERAL LETTER (SEM 1 WELCOME)

Dear Preschool Parents,

A warm welcome to the Academic Year 2025-26.

Parent Orientation 2025

We extend our gratitude to all parents who attended the Preschool Parent Orientation on July 21, 2025. This event provided an opportunity for interaction among parents, teachers, and administrators, familiarising them with one another and understanding the school's rules and procedures. We believe that parents and teachers are partners in providing the best education and environment for children to thrive.

Preschool Student Orientation 2025

At MGS Preschool, we are committed to providing students with holistic learning experiences, integrating all areas of development and emphasising play.

Books and Uniforms

The booklist will be published, and we kindly request that parents purchase the books and uniforms.

Professional Development

Ms. Hanna and Ms. Maemunnah attended a deep learning workshop to improve their teaching skills for young children. They learned to create mindful, meaningful, and joyful activities. Later, they shared this knowledge with other preschool teachers. This shows a commitment to building a community of dedicated educators who want to improve teaching and learning experiences at MGS Preschool.

What's new?

- MGS will use Google Education Plus for all its students. Here are things that you need to know about the Google Education Plus:
 - **What is Google Education Plus?**
 - It is a learning management system from Google.
 - Google Classroom: This is where teachers share homework, give announcements, and put learning materials.
 - Teachers can also upload activity pictures and post narrative comments so parents can review the topics.
 - Gmail: Each student will receive their email account, and these accounts are very private and don't have ads.
 - **What are the benefits of Google Classroom?**
 - Students and parents can access the announcements, materials and grades anytime, anywhere with internet.
 - Students learn important skills for the future.
 - AI tools can give extra help for learning.

Jakarta Pusat 10720 - Indonesia

- Provides a platform for good communication between the teachers, parents and students.
- Safe and Private: Google Education Plus protects your child's information. No ads for students.

However, the implementation process includes setting up the platform, training, preparing the infrastructure, and communicating it to the parents. Since this is the first year of implementation, challenges are expected.

MGS is dedicated to providing quality education and care. We value parent input and are here to help.

Best regards,

MGS Preschool Department
